- Brookes and Gateshouse Hercules 5000 systems from 2021
- Custom Lewmar winches , Harken Furling system, Vang, are all Hydraulically powered to enable smaller crew sailing this magnificent Vessel.
- She has a beautifully crafted interior that is not expected to see at yachts in this performance category

### **General info:**

- Name: BY FARR - Ned 711 ( Ex YEOMAN XXX)
- Farr Yacht Design
- Builder: Eric Bongers South Africa ( Famous also for building Whitbread maxi Privateer and other Farr designs)
- EU VAT paid
- CE-exempt
- Dutch flag
- Location Spain (Alicante region)

### **Design**

Although Farr has been responsible for her lines and fractional rig, the superyacht designer Andrew Winch was responsible for the design of the profile, deck plan and interior. She was designed intended as a dual purpose racing-cruising yacht.

### **History**

Yachting World of January 1991 featured an article about this Farr 72:

#### **"VERSATILE YEOMAN XXX**

ONE of the most exciting cruiser-racers likely to be launched in 1991 is the new Bruce Farr-designed 72ft (21.9m) Yeoman XXX, currently being built in Cape Town, South Africa by Bongers.

Although Farr has been responsible for her lines and fractional rig, Andrew Winch was asked to draw the profile and to style and plan the deck. It has to be efficient for racing, comfortable when the yacht is cruising and stylish.

A number of wrap-over windows, common to many Winch designs, have been worked into the coachroof.

Robin Aisher described as the yacht's project manager is clearly intending to prove that the yacht can be effective in all types of racing and also be cruised comfortably by a small crew.

*The Company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. A buyer should instruct his agents, or his surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to prior sale, price change, or withdrawal without notice.*

After her launch, Yeoman will sail to the Caribbean to take part in Antigua Race Week, recross the Atlantic to sail the RORC programme under IMS and then the Fast-net under IOR.

She will take part in the St Malo Race Week and La Ni-oulargue in St Tropez before returning to Hamble Yacht Services in the autumn where she will have a complete interior."

## **COUNTING THE INPUT**

Plans were received by the builders, Eric Bongers Boatbuilder, in October 1989. According to Simon Bongers, who had a hands-on involvement from the beginning, work began immediately with the construction of the plug. "There were two or three guys working full time on the plug from October '89. Then in March last year twelve men were brought onto the job of building the hull proper and in November of 1991 Bobby (Bongers) joined us as systems buyer and consultant."

Yeoman XXX was launched just over a year later. In addition to the core team many small but important jobs were subcontracted. For instance Robert Gradl was responsible for the installation of the electrics. Salie Jacobs did most of the customized stainless steel work. Harry Anders made the sixteen 45 mm keelbolts and their nuts (R150 each). Fry's Metal cast the 9,2 ton keel. Sacos thermo-moulded the eight 10 mm acrylic wrap-around windows (RI 500 each). Brian Stevens of B Canvas designed and sewed all canvass accessories like hatch hoods and pipe-cots.

## **MATERIAL CHOICES**

Robin Aisher's specific demands of the boat dictated the exact choice of hull material. "Yeoman was built to race and for whichever regatta I entered I wanted to rate. She's consequently very much an IOR hull, but not built in exotic material so that we could rate under IMS."

What the designer Bruce Farr told SA Yachting underlines the owner's brief. "Robin Aisher began discussions with us in early 1989 regarding a new racer/cruiser which is now realized as Yeoman XXX. Aisher had in mind a fast light-displacement yacht capable of worldwide IMS racing and cruising."

## **General**

### **Keel**

The 9,2 ton keel which is 3,95 metres deep bolts onto a metal H-frame inside the boat. A further four tons of lead ballast (16 x 250 kg blocks) is fixed amidships inside the vessel.

### **Construction**

- Foam sandwich construction with vinylester resin
- Hull and deck in AWL grip Alpina white
- Cockpits, deck and superstructure would benefit from a new paintjob

## **Rigging**

### Fractional rig

- Carbon mast and Carbon Park avenue boom Lorima (november 2021).
  - Mast height: 32,03 mtr/ 105.12 Ft
- Mast rake: 1 degree

*The Company offers the details of this vessel in good faith but cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. A buyer should instruct his agents, or his surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to prior sale, price change, or withdrawal without notice.*

## Viewing Arrangements

Due to the corona crisis and the varying locations of our yachts, we offer viewings of yachts for sale anywhere in the world from the comfort of your own home. From live walk-throughs using tools such as WhatsApp, Facetime or Zoom you can literally zoom in to every corner and check out every detail of the decklayout, interior configuration, rig and the engine room.

During these guided tours, together with one of our brokers there is the opportunity to ask our brokers all questions you have as when you make a real-life visit.

Together with our specifications, this package will give you a realistic impression of the volume, layout and condition of the yacht and equipment.

After an online guided tour together with the package of information at hand, you can decide if you like to see the yacht, or wish to send a surveyor to check the yacht. We hope to see you soon online or in real life for a visit on the yacht of your dreams.
